

Vyapaari

FOR UDHYAM LEARNING FOUNDATION

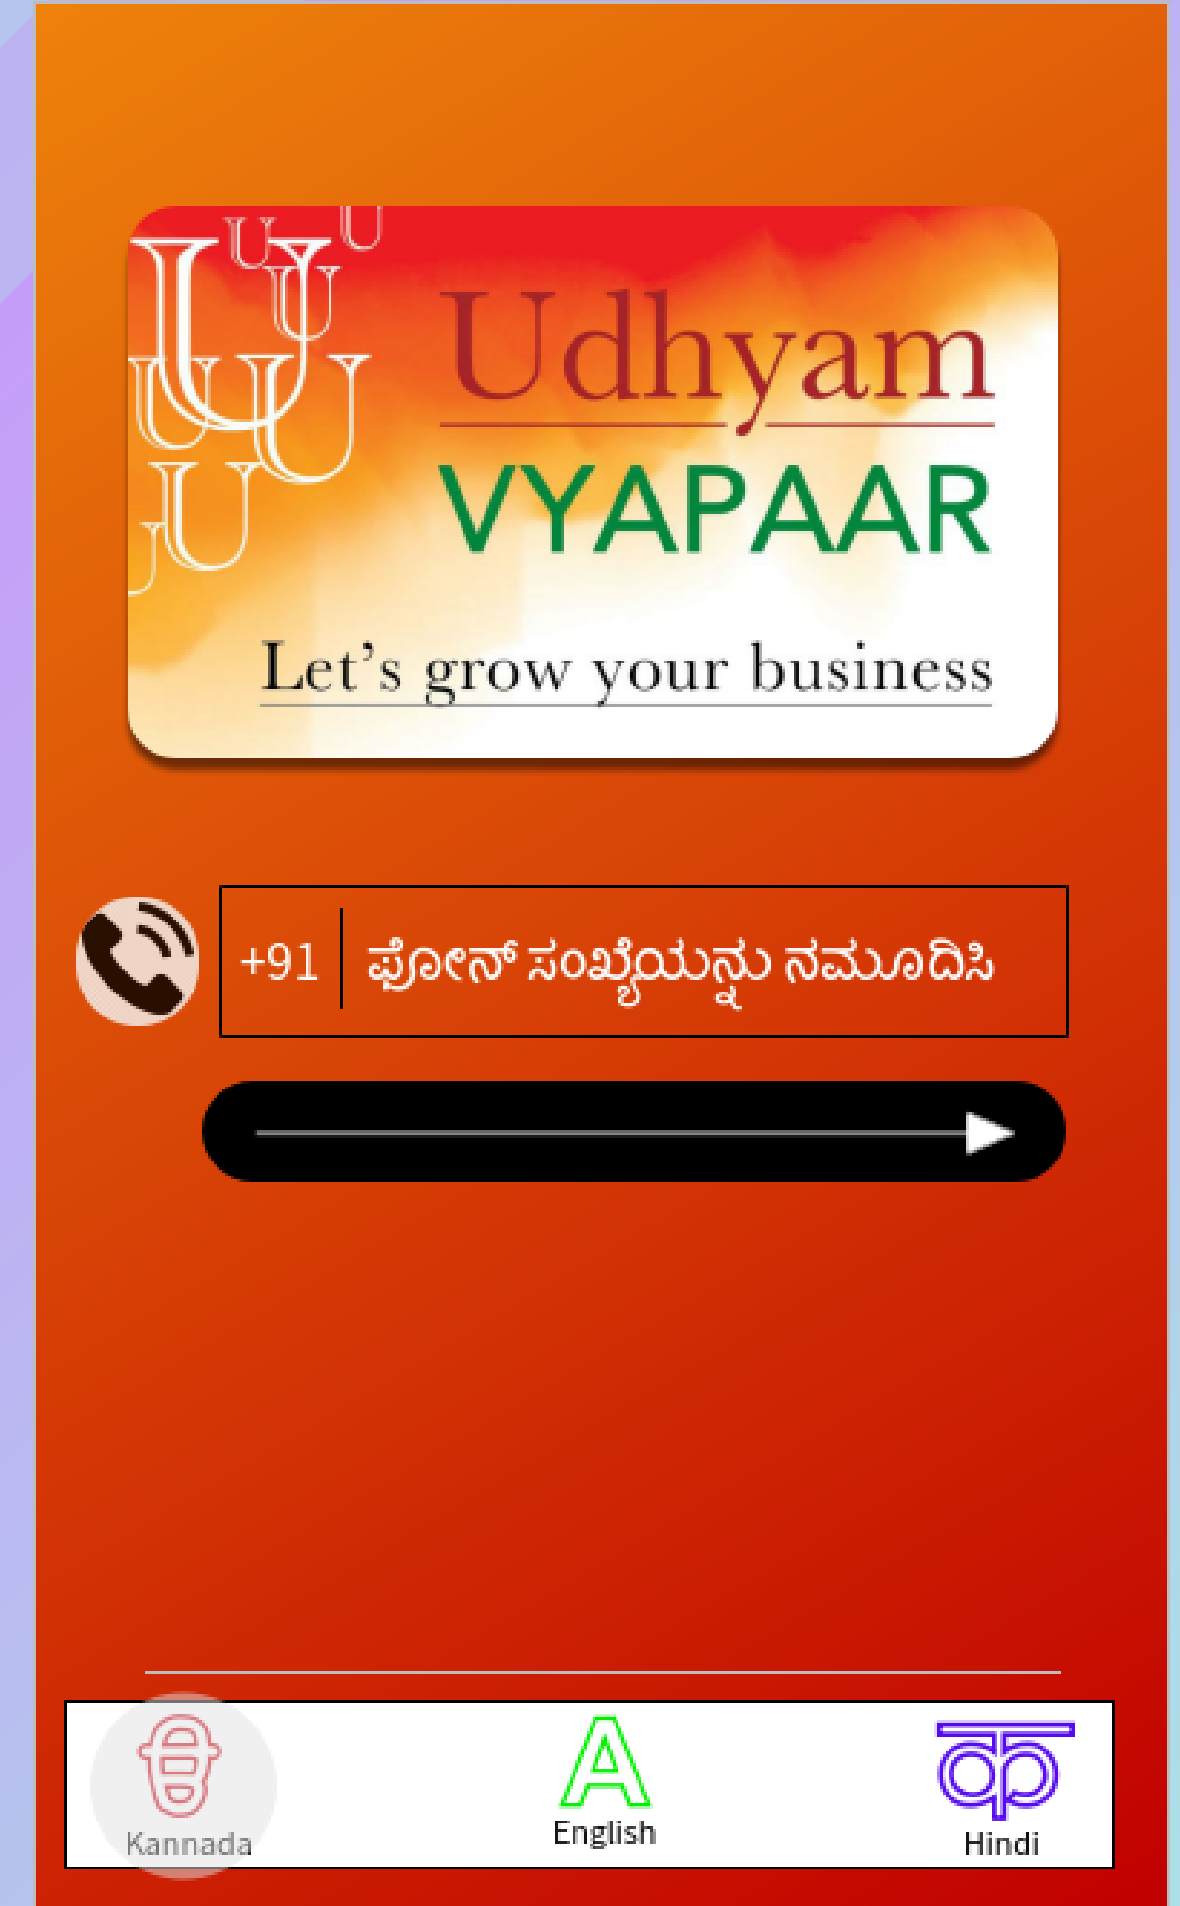

"India has 95 micro businesses
for every 5 small, medium and
large enterprises"

A Short Introduction

Vyapaari is an easy-to-use application that aims at boosting the productivity, discoverability and in-turn, the income generated by micro-businesses by giving them a platform to be visible to the urban public, who might not be aware of their existence.

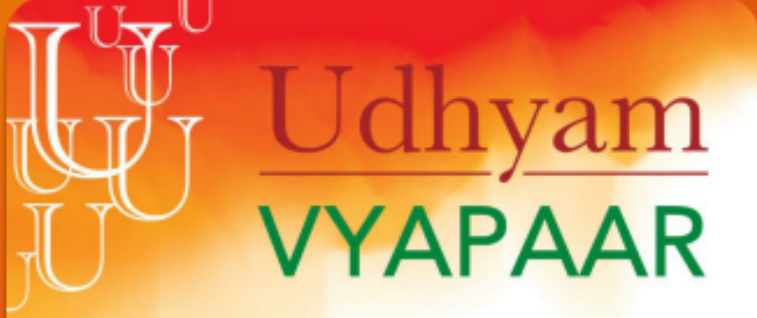

Challenges Tackled

- Discoverability of Micro-Entrepreneurs in the urban landscape: Our Web App "Vyapaari" provides users with categorised listings of their local micro-businesses catering to the user's needs.
- Ease of use for the layman: Our Vendor side app has a very simple and descriptive user interface, available in 3 languages, to ensure nothing hampers the growth of a vyapaari's business.
- Delivery of Goods/Services: The problem of delivery of goods is tackled by an efficient GeoLocation based mapping of the nearest delivery person to tackle the job.
